Car Segment Booking 1

Tuesday, October 23, 2018   11:36 AM

Currently, the way we populate High Rate and Low Rate in Car panel is also based on whether the car segment is In Policy or Out Of Policy. Right now, the behavior is as follows (please refer to [US4222 - Car Panel - Populate High and Low rate (EMEA/APAC)](#) for more details):

1. If Car is In Policy, then Charged Rate will be used to populate Low Rate and High Rate (Charged = Low = High)
2. If Car is Out of Policy, then Charged Rate will be used to populate High Rate, and Low Rate will be empty and highlighted in gold (Charged = High, Low = blank)
3. If there's no Client Policy for Car, then Charged Rate will be used to populate Low Rate and High Rate (Charged = Low =High)

Is it correct that the expected result now is that if the car rate is on-request, regardless if it's in policy or out of policy, we will now always default Charged rate, High rate, and Low rate to 0,00?

We have existing test data for Car Panel with all the relevant SOs already setup, please refer to them in the table below.
@QAs, if you need a dedicated automation test data, let me know and I can clone the necessary clients we need.

GDS	Team	Client	Traveler**
Apollo	Noram QA	Apollo 1 - SyEx ¦ 1V US Car Panel Testing	Day, Anette
Sabre	Noram QA	Sabre 1 - SyEx ¦ 1S US Car Panel Testing	Kirk, James
Amadeus	FR QA Team Amadeus	FR Amadeus 1 - SyEx ¦ 1A FR Car Panel Testing	Smith, Walden
Galileo	UK QA Team Galileo	UK Galileo 1 - SyEx ¦ 1G UK Car Panel Testing	Smith, Walden

Car Vendor Policy	Car Type Policy	Client Policy	High Rate	Low Rate	Charged Rate	Missed Saving Code Default Value	Charged Rate Prepopulated
Preferred	Preferred or No Policy	In Policy	CR	CR	CR	L	YES
Preferred or No Policy	Preferred	In Policy	CR	CR	CR	L	YES
Preferred or No Policy	Prohibited or Non-preferred	Out of Policy	CR	{empty}	CR		YES
No Policy	No Policy	No Policy	CR	CR	CR	L	YES
Prohibited or Non-preferred	Preferred or No Policy	Out of Policy	CR	{empty}	CR		YES

CR: Charged Rate
LR: Low Rate
HR: High Rate

Rules:
(1) **Out of Policy:** IF ,Either Car Vendor or Car Type is Prohibited or Non-preferred then Car Segment deemed to be Out of Policy
(2) **In Policy**   : IF ,Either Car Vendor or Car Type is Preferred then Car Segment deemed to be In-Policy
